It's time to put the power of  
**GOSS Power Products**  
in your portfolio.

GOSS Power Products Ltd. is a privately owned Canadian corporation. Our long association as both a manufacturer and distributor with the Automotive Aftermarket and O.E. in North America has flourished for more than 50 years.

While GOSS sources its products from overseas, our employees in China constantly monitor quality control, production output, product development, engineering and establish process controls.

The GOSS product assortment is fully supported by innovative distribution methods, a broad service network and a knowledgeable technical sales and end-user team.

We are committed to follow our core values and incorporate them into our quality policy and mission statement every day! We know our success can only be guaranteed by continuous improvement of the people, systems, processes, technology and suppliers to ensure that we meet the current and future needs of you - our clients.

At GOSS, we deliver quality products at prices that improve our customer's bottom line. Our flexible sourcing methods and private label capabilities mean that we can assist you in adapting to an ever changing market.
